Title : Packing tray change notice

Schedule : From 2023/Nov shipping

[Applicable model]

All types of HG37

1. Type of changing

- Parts Structure Packing その他
- New mold Repair of m Process Checking Factory
- Supplier Equipment Jig Logistics

2. Reason

Our HG37 series is shipped in a styrofoam tray.

However, foam trays are difficult to obtain at overseas factories, and from an environmental point of view, they have a large volume when discarded and are not suitable for recycling.

For this reason, we plan to change to a general plastic tray.

In addition, as a result of the evaluation of packaging vibration and drop, there was no problem with the characteristics even after changing the packaging.

Current

Form tray 15pcs/tray × 3layers = 45pcs / carton

After changing

Plastic tray 9pcs/tray × 2layers × 2packs = 36pcs / carton

Attached

Comparison of old and new packaging methods

Comparison of old and new packaging methods(HG37)
