

Dear Valued Customer,

As announced in 2022, 3M intends to spin off its 3M Health Care business (the “Health Care Business”), resulting in two world-class independent companies: 3M will remain a leading global material science innovator, serving global customers across a range of diverse and attractive end markets; and 3M’s Health Care business will become a dedicated global diversified health care technology leader.

3M will be taking steps to internally separate (“Internal Separation”) the Health Care Business by Q4 2023. This will be followed by a formal spin-off (the “Spin”) of the Health Care Business into a new publicly listed company in early 2024*. Our goal is to have a smooth transition that enables continued access to our innovative products and solutions, so we have built a plan for each of our customers.

In preparation, we identified your account as having purchased both 3M Health Care products and products from 3M’s other business groups, such as respirators from our Personal Safety Division (PSD). Based on the output of our customer-by-customer review, we believe 3M can better service your fulfillment needs through a distributor model versus a direct sales model for select products referred to in Appendix I.

Overview of Changes

IMPORTANT: Internal Separation efforts will include changes to our distribution model effective November 1, 2023. Be assured, our local teams will work with you to find our products through our network of vendors to ensure business continuity for you and your partners. Once this change is made, you will no longer be able to order the listed products directly from the Health Care Business. This does not impact the ordering of 3M’s other business group products (see Appendix II).

To ensure on-time, seamless access to these products, we ask that you begin ordering from one of our authorized distributors prior to *October 1, 2023*, for products listed in Appendix I. Orders will be accepted until *September 29, 2023*. If there are any changes to these dates, you will be contacted.

Currently, there are no changes in placing orders for 3M products including 3M N95 Healthcare Particulate Respirator and Surgical Mask, 3M Futuro™ branded products, Ace™ branded products, and Nexcare™ branded products. These products can be accessed using your current 3M ordering portal (e.g. 3M bCom).

Please share this communication with all relevant individuals within your organization. If you have any immediate questions or concerns, please contact your local 3M representative.

Best Regards,

Michael Lee
Vice President U.S. and Canada
Medical Solutions Division | 3M Health Care Business Group

*This timeline is indicative, as consultations can, in some countries, go longer than indicated and are subject to customary conditions, including final approval from the 3M Board of Directors, regulatory approvals and rulings, among other items.
