

Product Advisory (PA)

Subject: Change of packing two reels per inner box to one reel per inner box

Publication Date: 11/27/2023

Effective Date: 1/1/2024

Revision Description:

Initial Release

Description of Change:

Dear customer,

In the ongoing integration and alignment of working methods and procedures within Renesas, we want to inform you of the following change.

Currently we have for the attached list of products a packing method where 2 reels per inner box are packed. We will change this to 1 reel per inner box.

This is to bring the packing method for these products in line with all other products within Renesas, but also due to system standardization that will not allow us to pack 2 reels in one inner box.

This change will be implemented per Jan-1, 2024 which means that all new manufactured products as of that date will be packed as 1 reel per inner box.

Existing already packed material will not be repacked and shipped as is.

In case you have any questions please contact your local sales representative

Affected Product List:

See attached file.

Note:

Questions or requests pertaining to this change notice, including additional data, must be sent to Renesas within 30 days of the publication date.

For additional information regarding this notice, please contact your Renesas sales representative.
