Engineering Controls
Ventilation

Normal ventilation is generally adequate, except in enclosed or low lying area.

Since the aluminum dust is bound in the matrix, it is not available as a respiration hazard under normal conditions or foreseeable emergency conditions.

Personal Protective Equipment

- Eye protection** Wear appropriate protective eyeglasses or chemical safety goggles.
RECOMMENDATION: Ensure that glasses have side shields for lateral protection.
- Skin Protection** For likely contacts, use of protective nitrile gloves or other chemically resistant gloves.
- Respiratory Protection** Under normal conditions of uses, no respiratory protection should be required due the low exposure to vapors.
Above 10 x OEL, use a positive-pressure, air-supplied respirator or a self-contained breathing apparatus.
RECOMMENDATION: Consult your local safety supply store to ensure that your respirator has a NIOSH (U.S.) approved filter cartridges appropriate for the ingredients listed in Section 3. The respirator should be fitted to the employee by a professional.

General Hygiene Considerations

Wash hands thoroughly with water and soap after handling.
