

Stranded or Solid UL1007 Hook Up Wire from Remington Industries is used across a variety of engineering and electronics industries. The single or multi conductor wire is made from tinned copper that offers high quality performance for all general-purpose electrical applications, and the PVC insulation protects the wire against abrasion, chemicals, oils, and solvents. By conforming to UL and MIL-spec specifications, the hook up wire provides excellent uniformity for processing, stripping, and terminating. This hook up wire is available in several wire gauges (from 14 to 28 AWG) to meet your specific requirements. It is also available in a variety of colors (see below) to allow for easy circuit identification, as well as numerous spool sizes (see below) for your convenience.
