

General Notification

201702003GU01

Issue Date: 12-Mar-2017

UPDATE

Here is your personalized notification about a Nexperia general announcement.
For detailed information we invite you to view this notification online

Quality

Label update for Country of Origin

Notification

To support international trade compliance requirements, a change is necessitated to call out the "Country of Origin" (COO) based on the country where the last substantial transformation took place. Implementing from March 2017 this would be a cosmetic change only and does not impact the form, fit or function of the label

To comply with the international import and export regulations the Product Origin field (32T) will no longer be used to identify if product is diffused in the European Union (Z) or outside the European Union (N). This field will now have a 'O' prefix, identifying "Country of Origin", the remaining 3 numbers to identify the "Country of Origin" remains unchanged

Why do we issue this notification

Compliance to international import and export regulations

Update Information

Due to IT system problems during the transition from NXP to the new company Nexperia, it may be possible that some customers have not received the first notification of PCN 201702003G. This update, which has the same content as the first notification, shall make sure that every customer is informed. In case you have received the first notification, please disregard this update notification.
