

Product End of Life Notice
Model: Fusion Touch Modules (various models)

Date 02/16/2016

PREPARED BY: *JOSH HALSTEAD, FAE*

APPROVED BY: *ED SASAMOTO, PM MANAGER*

Dear Valued Customer,

Please accept this document as the official notification regarding the discontinuation of the following Fusion Touch Modules.

F07A-0102

F07A-0104

F07A-0114

F10A-0102

F10A-0114

Our records show that you have purchased at least one of these models in the past and we would like to extend the opportunity to explain the impact of this change.

TPK America continually evaluates and tracks end-of-life (EOL) of components used in our products. As such, we have received notification from one of our touch microcontroller vendors that they have discontinued a key component used in these models, specifically the Pixcir Tango-S32 chipset. Due to the unavailability of this chipset, TPK America has decided to EOL the affected models listed above and offer last time buy (LTB) support to our valued customers. Support for LTB will be offered until 03/18/2016.

In addition to evaluating new replacement microcontrollers, TPK America has also completed an overall product review and has finalized development of the next-generation Fusion Touch Modules.

TPK America representatives will be contacting customers, in the coming days, to assist with LTB demand planning and the potential phase-in of the next-generation product.

Sincerely,

TPK America, LLC
