# SIEMENS

### Data sheet

## US2:30CUBB32B1VF

2-speed 3-phase motor starter Size 0 Two separate windings Constant or variable torque Solid-state overload relays Low SPD OLR range 0.75-3.4A High SPD OLR range 0.75-3.4A 110V 50HZ / 120V 60HZ coil Enclosure NEMA type 1 Indoor general purpose use

product brand name	Class 30
design of the product	Full-voltage two speed motor starter
special product feature	ESP200 overload relay
General technical data	
weight [lb]	24 lb
Height x Width x Depth [in]	20 × 12 × 8 in
touch protection against electrical shock	NA for enclosed products
installation altitude [ft] at height above sea level maximum	6560 ft
ambient temperature [°F]	
during storage	-22 +149 °F
during operation	-4 +104 °F
ambient temperature	
during storage	-30 +65 °C
<ul> <li>during operation</li> </ul>	-20 +40 °C
country of origin	USA
Horsepower ratings	
yielded mechanical performance [hp] for 3-phase AC motor	
• at 200/208 V rated value	0 hp
• at 220/230 V rated value	0 hp
• at 460/480 V rated value	1 hp
• at 575/600 V rated value	2 hp
Contactor	
size of contactor	NEMA controller size 0
number of NO contacts for main contacts	6
operating voltage for main current circuit at AC at 60 Hz maximum	600 V
operational current at AC at 600 V rated value	18 A
mechanical service life (operating cycles) of the main contacts typical	1000000
Auxiliary contact	
number of NC contacts at contactor for auxiliary contacts	2
number of NO contacts at contactor for auxiliary contacts	2
number of total auxiliary contacts maximum	8
contact rating of auxiliary contacts of contactor according to UL	345VA@115VAC / 768VA@240VAC
Coil	
type of voltage of the control supply voltage	AC
control supply voltage	
• at AC at 50 Hz rated value	110 V
• at AC at 60 Hz rated value	120 V
holding power at AC minimum	8 W
apparent pick-up power of magnet coil at AC	218 VA

apparent holding power of magnet coil at AC	25 VA
operating range factor control supply voltage rated value of	25 VA 0 1
magnet coil	
percental drop-out voltage of magnet coil related to the input voltage	50 %
ON-delay time	19 29 ms
OFF-delay time	10 24 ms
Overload relay	
product function	
<ul> <li>overload protection</li> </ul>	Yes
<ul> <li>phase failure detection</li> </ul>	Yes
<ul> <li>asymmetry detection</li> </ul>	Yes
<ul> <li>ground fault detection</li> </ul>	Yes
test function	Yes
external reset	Yes
reset function	Manual, automatic and remote
trip class	CLASS 5 / 10 / 20 (factory set) / 30
adjustable current response value current of overload relay	
<ul> <li>for low rotational speed</li> </ul>	0 3 A
for high rotational speed	0 3 A
tripping time at phase-loss maximum	3 s
relative repeat accuracy	1 %
product feature protective coating on printed-circuit board	Yes
number of NC contacts of auxiliary contacts of overload relay	1
number of NO contacts of auxiliary contacts of overload relay	1
operational current of auxiliary contacts of overload relay	
• at AC at 600 V	5 A
• at DC at 250 V	1A
contact rating of auxiliary contacts of overload relay according to UL	5
insulation voltage (Ui)	
<ul> <li>with single-phase operation at AC rated value</li> </ul>	600 V
with multi-phase operation at AC rated value	300 V
with multi-phase operation at AC rated value Enclosure	300 V
with multi-phase operation at AC rated value Enclosure design of the housing	
with multi-phase operation at AC rated value Enclosure design of the housing Mounting/wiring	300 V indoors, usable on a general basis
with multi-phase operation at AC rated value  Enclosure  design of the housing  Mounting/wiring mounting position	300 V indoors, usable on a general basis vertical
with multi-phase operation at AC rated value Enclosure design of the housing Mounting/wiring mounting position fastening method	300 V indoors, usable on a general basis vertical Surface mounting and installation
with multi-phase operation at AC rated value Enclosure design of the housing Mounting/wiring mounting position fastening method type of electrical connection for supply voltage line-side	300 V indoors, usable on a general basis vertical Surface mounting and installation Screw-type terminals
with multi-phase operation at AC rated value  Enclosure  design of the housing  Mounting/wiring  mounting position fastening method type of electrical connection for supply voltage line-side tightening torque [lbf-in] for supply	300 V indoors, usable on a general basis vertical Surface mounting and installation Screw-type terminals 20 20 lbf-in
with multi-phase operation at AC rated value Enclosure design of the housing Mounting/wiring mounting position fastening method type of electrical connection for supply voltage line-side	300 V indoors, usable on a general basis vertical Surface mounting and installation Screw-type terminals
with multi-phase operation at AC rated value  Enclosure  design of the housing  Mounting/wiring  mounting position fastening method type of electrical connection for supply voltage line-side tightening torque [lbf-in] for supply type of connectable conductor cross-sections at line-side for AWG cables single or multi-stranded temperature of the conductor for supply maximum permissible	300 V indoors, usable on a general basis vertical Surface mounting and installation Screw-type terminals 20 20 lbf-in 1 75 °C
with multi-phase operation at AC rated value  Enclosure  design of the housing  Mounting/wiring  mounting position fastening method type of electrical connection for supply voltage line-side tightening torque [lbf-in] for supply type of connectable conductor cross-sections at line-side for AWG cables single or multi-stranded temperature of the conductor for supply maximum permissible material of the conductor for supply	300 V indoors, usable on a general basis vertical Surface mounting and installation Screw-type terminals 20 20 lbf-in 1 75 °C AL or CU
with multi-phase operation at AC rated value  Enclosure  design of the housing  Mounting/wiring  mounting position fastening method type of electrical connection for supply voltage line-side tightening torque [lbf-in] for supply type of connectable conductor cross-sections at line-side for AWG cables single or multi-stranded temperature of the conductor for supply maximum permissible material of the conductor for supply type of electrical connection for load-side outgoing feeder	300 V indoors, usable on a general basis vertical Surface mounting and installation Screw-type terminals 20 20 lbf-in 1 75 °C AL or CU Screw-type terminals
with multi-phase operation at AC rated value     Enclosure     design of the housing     Mounting/wiring     mounting position     fastening method     type of electrical connection for supply voltage line-side     tightening torque [lbf-in] for supply     type of connectable conductor cross-sections at line-side for     AWG cables single or multi-stranded     temperature of the conductor for supply maximum permissible     material of the conductor for supply     type of electrical connection for load-side outgoing feeder     tightening torque [lbf-in] for load-side outgoing feeder	300 V indoors, usable on a general basis vertical Surface mounting and installation Screw-type terminals 20 20 lbf-in 1 75 °C AL or CU Screw-type terminals 20 24 lbf-in
with multi-phase operation at AC rated value  Enclosure  design of the housing  Mounting/wiring  mounting position fastening method type of electrical connection for supply voltage line-side tightening torque [lbf-in] for supply type of connectable conductor cross-sections at line-side for AWG cables single or multi-stranded temperature of the conductor for supply maximum permissible material of the conductor for supply type of electrical connection for load-side outgoing feeder	300 V indoors, usable on a general basis vertical Surface mounting and installation Screw-type terminals 20 20 lbf-in 1 75 °C AL or CU Screw-type terminals
with multi-phase operation at AC rated value     Enclosure     design of the housing     Mounting/wiring     mounting position     fastening method     type of electrical connection for supply voltage line-side     tightening torque [lbf-in] for supply     type of connectable conductor cross-sections at line-side for     AWG cables single or multi-stranded     temperature of the conductor for supply maximum permissible     material of the conductor for supply     type of electrical connection for load-side outgoing feeder     tightening torque [lbf-in] for load-side outgoing feeder     type of connectable conductor cross-sections for AWG cables	300 V indoors, usable on a general basis vertical Surface mounting and installation Screw-type terminals 20 20 lbf-in 1 75 °C AL or CU Screw-type terminals 20 24 lbf-in
with multi-phase operation at AC rated value     Enclosure     design of the housing     Mounting/wiring     mounting position     fastening method     type of electrical connection for supply voltage line-side     tightening torque [lbf-in] for supply     type of connectable conductor cross-sections at line-side for     AWG cables single or multi-stranded     temperature of the conductor for supply maximum permissible     material of the conductor for supply     type of electrical connection for load-side outgoing feeder     tightening torque [lbf-in] for load-side outgoing feeder     type of connectable conductor cross-sections for AWG cables     for load-side outgoing feeder     type of connectable conductor cross-sections for AWG cables     for load-side outgoing feeder     type of connectable conductor cross-sections for AWG cables     for load-side outgoing feeder     type of connectable conductor for load-side outgoing feeder	300 V indoors, usable on a general basis vertical Surface mounting and installation Screw-type terminals 20 20 lbf-in 1 75 °C AL or CU Screw-type terminals 20 24 lbf-in 2
with multi-phase operation at AC rated value     Enclosure     design of the housing     Mounting/wiring     mounting position     fastening method     type of electrical connection for supply voltage line-side     tightening torque [lbf-in] for supply     type of connectable conductor cross-sections at line-side for     AWG cables single or multi-stranded     temperature of the conductor for supply maximum permissible     material of the conductor for supply     type of electrical connection for load-side outgoing feeder     tightening torque [lbf-in] for load-side outgoing feeder     type of connectable conductor cross-sections for AWG cables     for load-side outgoing feeder     type of connectable conductor for supply     type of electrical connection for load-side outgoing feeder     tightening torque [lbf-in] for load-side outgoing feeder     type of connectable conductor for supply	300 V indoors, usable on a general basis vertical Surface mounting and installation Screw-type terminals 20 20 lbf-in 1 75 °C AL or CU Screw-type terminals 20 24 lbf-in 2 75 °C
with multi-phase operation at AC rated value     Enclosure     design of the housing     Mounting/wiring     mounting position     fastening method     type of electrical connection for supply voltage line-side     tightening torque [lbf·in] for supply     type of connectable conductor cross-sections at line-side for     AWG cables single or multi-stranded     temperature of the conductor for supply maximum permissible     material of the conductor for supply     type of electrical connection for load-side outgoing feeder     tightening torque [lbf·in] for load-side outgoing feeder     type of connectable conductor for load-side outgoing feeder     type of connectable conductor for load-side outgoing feeder     type of the conductor for load-side outgoing feeder     type of the conductor for load-side outgoing feeder     temperature of the conductor for load-side outgoing feeder     type of the conductor for load-side outgoing feeder     temperature of the conductor for load-side outgoing feeder     maximum permissible     material of the conductor for load-side outgoing feeder	300 V indoors, usable on a general basis vertical Surface mounting and installation Screw-type terminals 20 20 lbf-in 1 75 °C AL or CU Screw-type terminals 20 24 lbf-in 2 75 °C CU
with multi-phase operation at AC rated value     Enclosure     design of the housing     Mounting/wiring     mounting position     fastening method     type of electrical connection for supply voltage line-side     tightening torque [lbf-in] for supply     type of connectable conductor cross-sections at line-side for     AWG cables single or multi-stranded     temperature of the conductor for supply maximum permissible     material of the conductor for load-side outgoing feeder     tightening torque [lbf-in] for load-side outgoing feeder     type of connectable conductor cross-sections for AWG cables     for load-side outgoing feeder     tightening torque [lbf-in] for load-side outgoing feeder     tightening torque [lbf-in] for load-side outgoing feeder     type of connectable conductor for load-side outgoing feeder     type of connectable conductor for load-side outgoing feeder     type of connectable conductor for load-side outgoing feeder     type of load-side outgoing feeder     type of the conductor for load-side outgoing feeder     temperature of the conductor for load-side outgoing feeder     type of electrical connection for load-side outgoing feeder	300 V indoors, usable on a general basis vertical Surface mounting and installation Screw-type terminals 20 20 lbf in 1 75 °C AL or CU Screw-type terminals 20 24 lbf in 2 75 °C CU Screw-type terminals
with multi-phase operation at AC rated value     Enclosure     design of the housing     Mounting/wiring     mounting position     fastening method     type of electrical connection for supply voltage line-side     tightening torque [lbf-in] for supply     type of connectable conductor cross-sections at line-side for     AWG cables single or multi-stranded     temperature of the conductor for supply maximum permissible     material of the conductor for load-side outgoing feeder     tightening torque [lbf-in] for load-side outgoing feeder     type of connectable conductor cross-sections for AWG cables     for load-side outgoing feeder     tightening torque [lbf-in] for load-side outgoing feeder     type of connectable conductor for load-side outgoing feeder     type of connectable conductor for load-side outgoing feeder     type of electrical connection of magnet coil     type of electrical connection of magnet coil     type of electrical connection of magnet coil for	300 V indoors, usable on a general basis vertical Surface mounting and installation Screw-type terminals 20 20 lbf in 1 75 °C AL or CU Screw-type terminals 20 24 lbf in 2 75 °C CU Screw-type terminals 5 12 lbf in
with multi-phase operation at AC rated value     Enclosure     design of the housing     Mounting/wiring     mounting position     fastening method     type of electrical connection for supply voltage line-side     tightening torque [lbf-in] for supply     type of connectable conductor cross-sections at line-side for     AWG cables single or multi-stranded     temperature of the conductor for supply maximum permissible     material of the conductor for load-side outgoing feeder     tightening torque [lbf-in] for load-side outgoing feeder     type of connectable conductor cross-sections for AWG cables     for load-side outgoing feeder     tightening torque [lbf-in] for load-side outgoing feeder     type of connectable conductor for load-side outgoing feeder     type of connectable conductor for load-side outgoing feeder     type of electrical connection of magnet coil     type of electrical connection of magnet coil     type of electrical connection of magnet coil     type of connectable conductor cross-sections of magnet coil for     AWG cables single or multi-stranded	300 V indoors, usable on a general basis vertical Surface mounting and installation Screw-type terminals 20 20 lbf-in 1 75 °C AL or CU Screw-type terminals 20 24 lbf-in 2 75 °C CU Screw-type terminals 5 12 lbf-in 2
with multi-phase operation at AC rated value     Enclosure     design of the housing     Mounting/wiring     mounting position     fastening method     type of electrical connection for supply voltage line-side     tightening torque [lbf-in] for supply     type of connectable conductor cross-sections at line-side for     AWG cables single or multi-stranded     temperature of the conductor for supply maximum permissible     material of the conductor for load-side outgoing feeder     tightening torque [lbf-in] for load-side outgoing feeder     type of connectable conductor cross-sections for AWG cables     for load-side outgoing feeder     tightening torque [lbf-in] for load-side outgoing feeder     type of connectable conductor for load-side outgoing feeder     type of connectable conductor for load-side outgoing feeder     type of electrical connection of magnet coil     temperature of the conductor for load-side outgoing feeder     type of connectable conductor for load-side outgoing feeder     type of connectable conductor for load-side outgoing feeder     type of electrical connection of magnet coil     tightening torque [lbf-in] at magnet coil     type of connectable conductor at magnet coil maximum     permissible	300 V indoors, usable on a general basis vertical Surface mounting and installation Screw-type terminals 20 20 lbf·in 1 75 °C AL or CU Screw-type terminals 20 24 lbf·in 2 75 °C CU Screw-type terminals 5 12 lbf·in 2 75 °C
with multi-phase operation at AC rated value  Enclosure  design of the housing  Mounting/wiring  mounting position fastening method type of electrical connection for supply voltage line-side tightening torque [lbf-in] for supply type of connectable conductor cross-sections at line-side for AWG cables single or multi-stranded temperature of the conductor for supply maximum permissible material of the conductor for supply type of connectable conductor cross-sections for AWG cables for load-side outgoing feeder tightening torque [lbf-in] for load-side outgoing feeder type of connectable conductor for load-side outgoing feeder type of electrical connection of magnet coil tightening torque [lbf-in] at magnet coil type of connectable conductor at magnet coil material of the conductor at magnet coil material of the conductor at magnet coil	300 V indoors, usable on a general basis vertical Surface mounting and installation Screw-type terminals 20 20 lbf in 1 75 °C AL or CU Screw-type terminals 20 24 lbf in 2 75 °C CU Screw-type terminals 5 12 lbf in 2 75 °C CU
with multi-phase operation at AC rated value     Enclosure     design of the housing     Mounting/wiring     mounting position     fastening method     type of electrical connection for supply voltage line-side     tightening torque [lbf-in] for supply     type of connectable conductor cross-sections at line-side for     AWG cables single or multi-stranded     temperature of the conductor for supply maximum permissible     material of the conductor for supply     type of electrical connection for load-side outgoing feeder     tightening torque [lbf-in] for load-side outgoing feeder     type of connectable conductor cross-sections for AWG cables     for load-side outgoing feeder     type of connectable conductor for load-side outgoing feeder     type of electrical connection of magnet coil     tightening torque [lbf-in] at magnet coil     type of connectable conductor at magnet coil maximum     permissible     material of the conductor at magnet coil     type of electrical connection for auxiliary contacts	300 V indoors, usable on a general basis vertical Surface mounting and installation Screw-type terminals 20 20 lbf in 1 75 °C AL or CU Screw-type terminals 20 24 lbf in 2 75 °C CU Screw-type terminals 5 12 lbf in 2 75 °C CU Screw-type terminals
with multi-phase operation at AC rated value     Enclosure     design of the housing     Mounting/wiring     mounting position     fastening method     type of electrical connection for supply voltage line-side     tightening torque [lbf-in] for supply     type of connectable conductor cross-sections at line-side for     AWG cables single or multi-stranded     temperature of the conductor for supply maximum permissible     material of the conductor for supply     type of electrical connection for load-side outgoing feeder     tightening torque [lbf-in] for load-side outgoing feeder     tightening torque [lbf-in] for load-side outgoing feeder     tightening torque [lbf-in] for load-side outgoing feeder     type of connectable conductor for supply     type of electrical connection for load-side outgoing feeder     type of connectable conductor for load-side outgoing feeder     type of load-side outgoing feeder single or multi-stranded     temperature of the conductor for load-side outgoing feeder     type of electrical connection of magnet coil     type of electrical connection of magnet coil     type of connectable conductor cross-sections of magnet coil for     AWG cables single or multi-stranded     temperature of the conductor at magnet coil     type of connectable conductor at magnet coil     type of electrical connection for auxiliary contacts     tightening torque [lbf-in] at contactor for auxiliary contacts     type of electrical connection for auxiliary contacts     type of electrical connection for auxiliary contacts     type of connectable conductor cross-sections at contactor for	300 V         indoors, usable on a general basis         vertical         Surface mounting and installation         Screw-type terminals         20 20 lbf in         1         75 °C         AL or CU         Screw-type terminals         20 24 lbf in         2         75 °C         CU         Screw-type terminals         5 12 lbf in         2         75 °C         CU         Screw-type terminals         5 12 lbf in         2         75 °C         CU         Screw-type terminals         1         1         1         1         1         2         75 °C         CU         Screw-type terminals         10 15 lbf in

material of the conductor at contactor for auxiliary contacts	CU
type of electrical connection at overload relay for auxiliary contacts	Screw-type terminals
tightening torque [lbf·in] at overload relay for auxiliary contacts	7 10 lbf·in
type of connectable conductor cross-sections at overload relay for AWG cables for auxiliary contacts single or multi-stranded	2
temperature of the conductor at overload relay for auxiliary contacts maximum permissible	75 °C
material of the conductor at overload relay for auxiliary contacts	CU
Short-circuit current rating	
design of the fuse link for short-circuit protection of the main circuit required	10
design of the short-circuit trip	Thermal magnetic circuit breaker
maximum short-circuit current breaking capacity (Icu)	
• at 240 V	14 kA
• at 480 V	10 kA
• at 600 V	10 kA
certificate of suitability	NEMA ICS 2; UL 508; CSA 22.2, No.14
Approvals Certificates	
Test Certificates
