

Product Change Notification

TE Connectivity

Product Change Notification: PCN-23-192205

PCN Date: 21-DEC-23

TE would like to inform you of the following change(s) to the listed TE Connectivity Product. In case of any further questions about this change(s), please contact your TE Connectivity Sales Engineer. Affected part, drawing and/or specification numbers are listed on the attached sheet(s).

Product Description: (Text limited to 120 characters)

DEUTSCH DT series Plug and Receptacle short cap and long cap change to black

General Description of Changes

As part of our ongoing efforts to reduce carbon footprint, the Industrial and Commercial Transportation business unit of TE Connectivity is standardizing the weld cap color of the Deutsch DT connectors to black (affected part numbers listed below). The standardized black weld caps will seamlessly integrate with the developing design features when new DT colors are added to our connector portfolio. This ensures a cohesive product with consistent aesthetics across the product line. These PNs are TE proprietary designs and, therefore, considered catalog/general market products. Level 4 PPAP requests must be submitted within 14 days of PCN submission via ict-ppap-request@te.com or ePPAP system. Submission will only occur with a request. Because all of the components are currently used in production, no samples are planned to be supplied because the change is entirely cosmetic, as a result, level 4 PPAP (PSW only) will be provided when requested, and disposition response is required within 14 days of the submit date or it will be considered approved. Product drawing(s) are affected.

<p>Current cap configuration</p> 	<p>Future cap configuration</p> 
<p>Only DT 2 position shown for illustration purposes.</p>	<p>However, the PCN applies to all DT contact arrangements with weld caps.</p>

Reason for Changes:

Dear Customer, we hereby inform you of this change. As part of our ongoing efforts to reduce our carbon footprint, we are standardizing the color of the weld caps to black across our entire DT connector portfolio. The change does not impact performance. **IMPORTANT:** In the field, current and prior revisions of these parts can be utilized interchangeably. The update is being implemented gradually, and earlier revisions can remain stocked until use. Shipments of both configurations may be mixed.
