

Bluetooth Dongle

KU:P5010002 Weight:35.30 Gram

Product Description:

Makeblock Bluetooth dongle is a BT4.0 (low power consumption) interface converter for Bluetooth devices that is designed mainly for short-distance wireless data transmission.

The dongle can pair with any Makeblock devices with built-in Bluetooth modules, which offers users a smoother wireless experience.

Features:

1. USB interface, plug-in directly to achieve Makeblock Bluetooth wireless programming device;
2. Only for Makeblock Bluetooth devices'
3. High transmission efficiency, low latency data transmission;
4. No cable needed, easy to carry and use;
5. Technology is more mature and the signal is more stable.

Specifications:

Bluetooth: Bluetooth 4.0

Host interface: USB 2.0

Power Supply: 5V

Output Power Class: Max. 4dBm

Receiving Sensitivity: -90dBm

Working Frequency Band: 2.4GHz-2.48GHz unlicensed ISM band

Battery: AA battery

Transmission distance: 15m(standard distance of Bluetooth device)

Part List:

1 x Bluetooth adapter
